

Clean Energy Columbus Fall 2024 Program Update

Fall Tips for Optimizing Energy Use

As fall approaches, maximize your energy efficiency by sealing gaps in windows and doors, scheduling a furnace tune-up, and regularly changing air filters. You can also adjust your thermostat to lower temperatures when away or asleep and raise it during active hours to reduce waste.

The City partners with IMPACT to help residents weatherize their homes. Check out IMPACT's FAQ page to see if you are eligible:

CEC At Work

Big Table Talk

On September 25, 2024, the Department of Public Utilities hosted a free event, "A Conversation on Clean Energy," led by Councilmember Christopher Wyche, Sustainable Columbus, and the Ohio Environmental Council. The discussion focused on future clean energy solutions for central Ohio and creating workflow development resources about sustainability.

Energy Efficiency Kits

This past summer, participants in CEC could request free Energy Efficiency Kits that included LED lightbulbs, a low-flow showerhead, and a window insulation kit to help them save energy. If you received a kit, please check for a satisfaction survey to share your savings!

LED Lightbulbs

Use up to **75% less energy** than traditional light bulbs

Showerhead

Can **save around 2,700 gallons/year** depending on model

Window Insulation

Up to **15% savings** on heating and cooling costs

Join the Program
